

Qualitäts-Maßstäbe

## Our traditional one

The quality measuring stick has joints with brass-plated spring fittings. The basic principle follows a 100-year-old technique. ADGA optimised the quality requirements with regards to visual appearance, stability and longevity and presents, with the ADGA 214, a modern, high-quality wooden folding ruler.

This measuring stick is suited to large advertising prints on the sidefaces.

### Special features:

Angle graduation

Starting section imprint
