## Our newest model combines nature and technology

The patented ADGA snap-in-latch technology uses the natural physical structure of hard beech wood. The protrusion snaps lock into the milled-out deepenings of the wood and lock the measuring stick section precisely and sturdily.

The invisible fittings and the tight-fitting sections allow filigree advertising imprints, even with smallest font sizes on the entire sideface.

Standard feature:

Red decimal numbers

Special features:

Sideface imprint

Special imprints

## Product features

Measuring stick 2 m

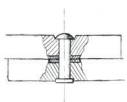

10 sections

Joints with patented ADGA snap-in-latch technology

Available colours:

natural
